MEMORANDUM FOR: (See Distribution)

FROM: John L. Helgerson
Director of Congressional Affairs

SUBJECT: Revision of Periodic Congressional Reporting
Requirements List

1. Attached for your use and information is the revised version of "Periodic Congressional Reporting Requirements of the Central Intelligence Agency." This revision replaces the one dated 1 May 1987 and incorporates changes necessitated by recent legislation, including the Fiscal Year 1989 Intelligence Authorization Act (Public Law No. 100-453).

2. The 1989 Authorization Act specifically established a requirement for the Director of Central Intelligence (DCI) to report semiannually to the Intelligence Committees a summary of the activities of the Inspector General for the preceding six months. The Agency has proposed to the Senate Select Committee on Intelligence (SSCI) that CIA include within that report a summary of any intelligence activities that violate any applicable law of the United States, any Executive Order or Presidential Directive, or significant violation of a rule or regulation issued pursuant to law, and which have also been reported to the Intelligence Oversight Board (IOB). This suggestion is designed to meet a separate SSCI request for materials forwarded to the IOB. The Inspector General is responsible for preparing this report, and will be assisted by the Office of General Counsel with respect to matters reported to the IOB.

3. As noted, this list does not include "one-time" reports, programmatic reports of the sort mentioned in the "Classified Annex" to the annual intelligence authorization bill conference report or other nonrecurring, miscellaneous reports. I do wish, however, to mention some of these as follows.

4. Contained in the FY '89 Act conference report (House Report No. 100-879) is a requirement for the DCI and the Secretary of Defense to submit to the Congress by March 1989 a plan for better utilizing the resources of the Intelligence Community to support anti-drug efforts (p. 22) and a requirement for the DCI to report by 31 December 1988 on the Security Evaluation Office (SEO) (p. 24).
